Info

In an amazing innovation in apartment living in NZ, you can choose a king-size up-and-over apartment spread over two floors on each side of the building. This unique design means more sunlight, views and space for each apartment.

A large open-plan living, dining and kitchen area, plus one bathroom and a double-bedroom are situated on the generously proportioned lower floor. Light fills this area from the floor-to-ceiling windows and sliding doors onto the balcony.

Three additional double-bedrooms are reached via your own private in-apartment staircase. The master is luxuriously finished with a walk-through wardrobe leading to its private en-suite bathroom.
